Physician and Surgeon,

No. 24 1-2 E. Washington St. IN CONNECTION WITH THE GENERAL PRACTICE

of Medicine, I treat by a new and reliable medium, and with the happiest results, all forms of diseases of the Nervous, Seminal and Urinary and Sexual systems. Young men with hollow cheeks and pallid countenance, telling in fearful language the silent working of some formidable disease undermining your constitution, memory and reason, hurrying you to a premature death, reflect while reason holds sway and avail yourself of a treatment that dissipates the slightest disease, and cures the harrassing weakness and other causes of serious difficulty and perpetual annoyance. Spermatorrhoa, Seminal Weakness, Nocturnal Emis sions, Sexual Debility, Impotency, Effects of Self-Abuse, and their results-Inability to Consummate the Marriage Contract, Mental and Physical Prostration, Epilepsy, 1865. Insanity and Consumption.

"The foe. Like a staunch murderer, steady to his purpose, Presses him close through every lane of life, Nor misses once the track, but presses on, Till forced at last to the tremendous verge, And at once he sinks." Likewise, I will guarantee a radical cure of Syphilis,

Gonorrhoea and Gleet, in all their stages, entirely re-moving from the blood the last spark of these terrible diseases that so gradually burn up the fountain of life. Diseases and Conditions Peculiar to Females.

The beauty and extreme delicacy of the female organization, to say nothing of its physiological characteristics, are sufficient indications that it is subject to forms of disease and modifications peculiar to itself. The physician of the present day does not encounter any more forms of uterine diseases than did the physician of fifty years ago; but owing to the present social condition of woman, her diseases are increased to frequency, and

to the truth of this assertion the melancholy deaths by consumption bear ample witness. At the American Dispensary we treat by new method, and "h the happlest results, Prolap-sus Uteri, (falling of the womb,) Eruptions of the "Costar's" Rat, Roach &c., Exter's yellowish, dirty green pallor of the surface; Emansio Messium, or absent Menstruction; Amenorrhea, or Retention of the Menses; Dysmenorrhea, a painful and difficult flow of the Menses; Menorrhagia, or profuse Men-

In some cases an emaciation is the first indication that attracts the attention of the patient's friends.
